ABSTRACT

The directory is designed to aid individuals desiring to become aware of postsecondary occupational programs available in the State of Illinois and is intended to serve only as an information tool. Part 1 of the directory lists the names of public postsecondary institutions alphabetically, their location, the occupationally oriented programs they offer, and the type of degree/certificate available on completion of each course. Part 2 provides a listing of those institutions offering programs under occupational cluster headings (apprentice trades, agribusiness and natural resources, business and office, communications and media, construction, environmental, fine arts and humanities and entertainment, health services, hospitality and recreation, manufacturing, marketing and distribution, personnal services, public services, and transportation). Included in the directory is an alphabetical index of occupational offerings. (Author/BP)

PREFACE

This Directory is designed to aid individuals desiring to become aware of post-secondary occupational programs available in the State. It is an information tool only and not intended for other uses.

Those programs offered by colleges in cooperation with other institutions are not included. Efforts were made to list only those programs offered on a listed campus.

Individuals desiring specific and detailed information on programs should contact the institution directly. This is especially true of programs which have relationships to licensing and apprentice procedures.

Included in the Directory is an index which lists occupational offerings and refers to a section number in the table of contents. The table of contents lists those programs available under various clusters of occupations.

PART ONE lists the names of public post-secondary institutions alphabetically, their location, the occupationally oriented programs they offer and the type of degree*/certificate available upon completion of the program.

PART TWO provides a listing of those institutions offering programs under the given cluster headings and by specific programs.
